

Seat Protection

SEAT PROTECTORS

The Kling-On is a revolutionary new seat protector that actually sticks to the seat and does not tear. This means that once fitted, the seat is protected all the way through the workshop process. This is especially useful in the bodyshop environment, where vehicles can be in repair for some time.

SEAT COVERS

Standard polythene seat covers to protect the seat during work in progress.
Plain white polythene, compact roll, 790 x 1300mm suitable for vehicles with head restraints

The Kling-On®
